

Year 4 Progression in Geography

Locational Knowledge	Map skills	Place Knowledge / Comparison	Human / Physical Geography
<ul style="list-style-type: none"> Identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle 		<ul style="list-style-type: none"> Locate the world's countries, using maps to focus on North America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities Understand geographical similarities and differences through the study of human and physical geography of a region within North America 	<ul style="list-style-type: none"> Physical geography, including: climate zones, biomes and vegetation belts
<p>Longitude, latitude, equator, tropics, poles</p> <ul style="list-style-type: none"> I know how the world is mapped using the equator and longitude and latitude lines I know the differences between the tropics and the poles 		<p>North America: New York</p> <ul style="list-style-type: none"> I know the climate and physical geography of the United States of America I know the impact of the climate and physical geography of the United States of people who live there 	<p>Climate zones, biomes and vegetation belts</p> <ul style="list-style-type: none"> I know that there are different biomes <p>Tropical rainforests</p> <ul style="list-style-type: none"> I know the features of tropical rainforests <p>Deserts</p> <ul style="list-style-type: none"> I know the features of hot deserts
<ul style="list-style-type: none"> I will know the name and location of the Equator using the symbols on a world map and a globe I will know the significance of the lines of longitude and latitude I will know the significance of the Tropics of Cancer and Capricorn I will know the significance of the Arctic and Antarctic Circles 	○	<ul style="list-style-type: none"> I will know the key physical geographical features of the United States of America I will know the key physical features of the landscapes of the United States of America: The Grand Canyon I will know the key features of the population of the United States of America 	<p>Climate zones, biomes and vegetation belts</p> <ul style="list-style-type: none"> I will know what biomes are I will know the location of rainforests on a world map I will know that the rainforest has different layers I will know and understand the climate zone of a rainforest

- *I will know how the climate has affected the physical features of the landscapes of the United States of America*
- *I will know the main types of foods and farming in the United State of America and the importance on the economy*
- *I will know the key human geographical features of the United States of America : New York*

Tropical rainforests

- *I will know the location and key features of the Amazon Rainforest*
- *I will know which animals live in the rainforest*
- *I will know how land is used in the Amazon Rainforest*
- *I will know how and why rainforests are under threat*

Deserts

- *I will know what a desert is and the location of deserts around the world*
- *I will know the features of a hot desert*
